

## Questions 2

1. If it is necessary to open batteries for sampling, will assistance opening said batteries be provided?

Assistance will not be provided.

2. We need to know, at least in general terms, how many trips per month is anticipated? How much sampling will be required during each trip? If the trip requires small batches then we won't need to include accommodations. However, if large batches are required, we'll need to include the costs for accommodations. Your response will help us to refine our pricing for this solicitation.

We are unable to provide the requested numbers due to the inconsistency of need/requirement. Depending on the waste stream, samples may be requested/required short notice, requiring turnaround times no greater than 3-5 working days.
