A sample format is available from the Contracting Officer. The following is the detail required by the Contracting Officer:
- (1) The principle categories of work shall be broken into line items of sufficient detail to allow meaningful measurement of the work on a monthly basis as determined by the COR. Units of measure appropriate to the type of work shall be used. "Lump sum" pricing of line items shall be avoided except where payment for that line item is to be requested based on 100% completion of that line item or where there is no other practical unit of measure.

Cost of Performance and Payment Bonds may be listed as a single line item and not pro-rated. - (b) Material stored on site may be included in earned progress if the Contractor furnishes satisfactory evidence that it has acquired title to such material and that the material will be used to perform in contract.
- (c) The following are instructions for submitting pay requests:
- (1) Requests are to be submitted with signature for the Contractor certification statement (scanned signature okay) to the Designated Billing Office. Use of a format that complies with all of the requirements of the "Payments" clause of the contract is mandatory. The "Contractor Payment Application" form will be provided at the Pre-Construction meeting.

(4) A completed Release of Claims that complies with the requirements of the “Payments” clause must be submitted with the request for final payment. A sample format is available from the Contracting Officer.

- (d) The final payment request will be rejected and returned to the contractor if all items required under the contract have not been completed, submitted, approved, and accepted prior to the receipt of the request; e.g., deficient work items, as-built, payrolls, reports, O&M manuals, delivery of extra stock material, etc.

 - (2) Payment is limited to major high-cost items. Payment of major high-cost items does not include contractor overhead and profit. Costs such as sales tax, freight, handling, pallets, etc., are excluded.

(2) Affiliates, as used in paragraph (a)(1) of this clause, means business concerns, one of whom directly or indirectly controls or has the power to control the others, or a third party or parties control or have the power to control the others. I.6. FAR 52.225-11 BUY AMERICAN - CONSTRUCTION MATERIALS UNDER TRADE AGREEMENTS (JAN 2021)

a) *Definitions*. As used in this clause—

Caribbean Basin country construction material means a construction material that—

- (1) Is wholly the growth, product, or manufacture of a Caribbean Basin country; or
- (2) In the case of a construction material that consists in whole or in part of materials from another country, has been substantially transformed in a Caribbean Basin country into a new and different construction material distinct from the materials from which it was transformed.

Commercially available off-the-shelf (COTS) item—

- (1) Means any item of supply (including construction material) that is—
 - (i) A commercial item (as defined in paragraph (1) of the definition at Federal Acquisition Regulation (FAR) [2.101](#));
 - (ii) Sold in substantial quantities in the commercial marketplace; and
 - (iii) Offered to the Government, under a contract or subcontract at any tier, without modification, in the same form in which it is sold in the commercial marketplace; and
- (2) Does not include bulk cargo, as defined in [46 U.S.C.40102\(4\)](#), such as agricultural products and petroleum products.

Component means an article, material, or supply incorporated directly into a construction material.

Construction material means an article, material, or supply brought to the construction site by the Contractor or subcontractor for incorporation into the building or work. The term also includes an item brought to the site preassembled from articles, materials, or supplies. However, emergency life safety systems, such as emergency lighting, fire alarm, and audio evacuation systems, that are discrete systems incorporated into a public building or work and that are produced as complete systems, are evaluated as a single and distinct construction material regardless of when or how the individual parts or components of those systems are delivered to the construction site. Materials purchased directly by the Government are supplies, not construction material.

Cost of components means—

(1) For components purchased by the Contractor, the acquisition cost, including transportation costs to the place of incorporation into the construction material (whether or not such costs are paid to a domestic firm), and any applicable duty (whether or not a duty-free entry certificate is issued); or

(2) For components manufactured by the Contractor, all costs associated with the manufacture of the component, including transportation costs as described in paragraph (1) of this definition, plus allocable overhead costs, but excluding profit. Cost of components does not include any costs associated with the manufacture of the construction material.

Designated country means any of the following countries:

(1) A World Trade Organization Government Procurement Agreement (WTO GPA) country (Armenia, Aruba, Australia, Austria, Belgium, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hong Kong, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea (Republic of), Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Moldova, Montenegro, Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Singapore, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Taiwan, Ukraine, or United Kingdom);

(2) A Free Trade Agreement (FTA) country (Australia, Bahrain, Canada, Chile, Colombia, Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Korea (Republic of), Mexico, Morocco, Nicaragua, Oman, Panama, Peru, or Singapore);

(3) A least developed country (Afghanistan, Angola, Bangladesh, Benin, Bhutan, Burkina Faso, Burundi, Cambodia, Central African Republic, Chad, Comoros, Democratic Republic of Congo, Djibouti, Equatorial Guinea, Eritrea, Ethiopia, Gambia, Guinea, Guinea-Bissau, Haiti, Kiribati, Laos, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mozambique, Nepal, Niger, Rwanda, Samoa, Sao Tome and Principe, Senegal, Sierra Leone, Solomon Islands, Somalia, South Sudan, Tanzania, Timor-Leste, Togo, Tuvalu, Uganda, Vanuatu, Yemen, or Zambia); or

(4) A Caribbean Basin country (Antigua and Barbuda, Aruba, Bahamas, Barbados, Belize, Bonaire, British Virgin Islands, Curacao, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, Saba, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Sint Eustatius, Sint Maarten, or Trinidad and Tobago).

"Designated country construction material" means a construction material that is a WTO GPA country construction material, an FTA country construction material, a least developed country construction material, or a Caribbean Basin country construction material.

Domestic construction material means—

(1) For construction material that does not consist wholly or predominantly of iron or steel or a combination of both-

(i) An unmanufactured construction material mined or produced in the United States; or

(ii) A construction material manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind for which nonavailability determinations have been made are treated as domestic. Components of unknown origin are treated as foreign; or

(B) The construction material is a COTS item; or

(2) For construction material that consists wholly or predominantly of iron or steel or a combination of both, a construction material manufactured in the United States if the cost of foreign

iron and steel constitutes less than 5 percent of the cost of all components used in such construction material. The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the construction material and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. Iron or steel components of unknown origin are treated as foreign. If the construction material contains multiple components, the cost of all the materials used in such construction material is calculated in accordance with the definition of "cost of components".

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

Foreign construction material means a construction material other than a domestic construction material.

Foreign iron and steel means iron or steel products not produced in the United States. Produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, from the initial melting stage through the application of coatings, except metallurgical processes involving refinement of steel additives. The origin of the elements of the iron or steel is not relevant to the determination of whether it is domestic or foreign.

Free Trade Agreement country construction material means a construction material that-

- (1) Is wholly the growth, product, or manufacture of a Free Trade Agreement (FTA) country; or
- (2) In the case of a construction material that consists in whole or in part of materials from another country, has been substantially transformed in a FTA country into a new and different construction material distinct from the materials from which it was transformed.

Least developed country construction material means a construction material that-

- (1) Is wholly the growth, product, or manufacture of a least developed country; or
- (2) In the case of a construction material that consists in whole or in part of materials from another country, has been substantially transformed in a least developed country into a new and different construction material distinct from the materials from which it was transformed.

Predominantly of iron or steel or a combination of both means that the cost of the iron and steel content exceeds 50 percent of the total cost of all its components. The cost of iron and steel is the cost of the iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product and a good faith estimate of the cost of iron or steel components excluding COTS fasteners.

Steel means an alloy that includes at least 50 percent iron, between 0.02 and 2 percent carbon, and may include other elements.

United States means the 50 States, the District of Columbia, and outlying areas.

WTO GPA country construction material means a construction material that-

- (1) Is wholly the growth, product, or manufacture of a WTO GPA country; or
- (2) In the case of a construction material that consists in whole or in part of materials from another country, has been substantially transformed in a WTO GPA country into a new and different construction material distinct from the materials from which it was transformed.

(b) Construction materials.

(1) This clause implements [41 U.S.C. chapter 83](#), Buy American, by providing a preference for domestic construction material. In accordance with [41 U.S.C.1907](#), the domestic content test of the Buy American statute is waived for construction material that is a COTS item, except that for construction material that consists wholly or predominantly of iron or steel or a combination of both, the domestic content test is applied only to the iron and steel content of the construction material, excluding COTS fasteners. (See FAR [12.505\(a\)\(2\)](#)). In addition, the Contracting Officer has determined that the WTO GPA and Free Trade Agreements (FTAs) apply to this acquisition. Therefore, the Buy American restrictions are waived for designated country construction materials.

(2) The Contractor shall use only domestic or designated country construction material in performing this contract, except as provided in paragraphs (b)(3) and (b)(4) of this clause.

(3) The requirement in paragraph (b)(2) of this clause does not apply to information technology that is a commercial item or to the construction materials or components listed by the Government as follows:

[Contracting Officer to list applicable excepted materials or indicate "none"]

(4) The Contracting Officer may add other foreign construction material to the list in paragraph (b)(3) of this clause if the Government determines that-

(i) The cost of domestic construction material would be unreasonable. The cost of a particular domestic construction material subject to the restrictions of the Buy American statute is unreasonable when the cost of such material exceeds the cost of foreign material by more than 20 percent;

(ii) The application of the restriction of the Buy American Act to a particular construction material would be impracticable or inconsistent with the public interest; or

(iii) The construction material is not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities of a satisfactory quality.

(c) Request for determination of inapplicability of the Buy American statute.

(1)

(i) Any Contractor request to use foreign construction material in accordance with paragraph (b)(4) of this clause shall include adequate information for Government evaluation of the request, including-

(A) A description of the foreign and domestic construction materials;

(B) Unit of measure;

(C) Quantity;

(D) Price;

(E) Time of delivery or availability;

(F) Location of the construction project;

(G) Name and address of the proposed supplier; and

(H) A detailed justification of the reason for use of foreign construction materials cited in accordance with paragraph (b)(3) of this clause.

(ii) A request based on unreasonable cost shall include a reasonable survey of the market and a completed price comparison table in the format in paragraph (d) of this clause.

(iii) The price of construction material shall include all delivery costs to the construction site and any applicable duty (whether or not a duty-free certificate may be issued).

(iv) Any Contractor request for a determination submitted after contract award shall explain why the Contractor could not reasonably foresee the need for such determination and could not have requested the determination before contract award. If the Contractor does not submit a satisfactory explanation, the Contracting Officer need not make a determination.

(2) If the Government determines after contract award that an exception to the Buy American statute applies and the Contracting Officer and the Contractor negotiate adequate consideration, the Contracting Officer will modify the contract to allow use of the foreign construction material. However, when the basis for the exception is the unreasonable price of a domestic construction material, adequate consideration is not less than the differential established in paragraph (b)(4)(i) of this clause.

(3) Unless the Government determines that an exception to the Buy American statute applies, use of foreign construction material is noncompliant with the Buy American statute.

(d) *Data*. To permit evaluation of requests under paragraph (c) of this clause based on unreasonable cost, the Contractor shall include the following information and any applicable supporting data based on the survey of suppliers:

Foreign and Domestic Construction Materials Price Comparison			
Construction Material Description	Unit of Measure	Quantity	Price (Dollars)*
Item1			
Foreign construction material	_____	_____	_____
Domestic construction material	_____	_____	_____
Item1			
Foreign construction material	_____	_____	_____
Domestic construction material	_____	_____	_____

[* Include all delivery costs to the construction site and any applicable duty (whether or not a duty-free entry certificate is issued)].

[List name, address, telephone number, and contact for suppliers surveyed. Attach copy of response; if oral, attach summary.]

[Include other applicable supporting information.]

(End of clause)

I.7 52.228-15 PERFORMANCE AND PAYMENT BONDS – CONSTRUCTION (JUN 2020)

(a) Definitions. As used in this clause-

Original contract price does not include the price of any options, except those options exercised at the time of contract award.

(b) Amount of required bonds. Unless the resulting contract price is valued at or below the threshold specified in Federal Acquisition Regulation 28.102-1(a) on the date of award of this contract, the successful offeror shall furnish performance and payment bonds to the Contracting Officer as follows:

(1) Performance bonds (Standard Form 25). The penal amount of performance bonds at the time of contract award shall be 100 percent of the original contract price.

(2) Payment Bonds (Standard Form 25A). The penal amount of payment bonds at the time of contract award shall be 100 percent of the original contract price.

(3) Additional bond protection. (i) The Government may require additional performance and payment bond protection if the contract price is increased. The increase in protection generally will equal 100 percent of the increase in contract price.

(ii) The Government may secure the additional protection by directing the Contractor to increase the penal amount of the existing bond or to obtain an additional bond.

(c) Furnishing executed bonds. The Contractor shall furnish all executed bonds, including any necessary reinsurance agreements, to the Contracting Officer, within the time period specified in the Bid Guarantee provision of the solicitation, or otherwise specified by the Contracting Officer, but in any event, before starting work.

(d) Surety or other security for bonds. The bonds shall be in the form of firm commitment, supported by corporate sureties whose names appear on the list contained in Treasury Department Circular 570, individual sureties, or by other acceptable security such as postal money order, certified check, cashier's check, irrevocable letter of credit, or, in accordance with Treasury Department regulations, certain bonds or notes of the United States. Or via the internet at <http://www.fms.treas.gov/c570/>.

(e) Notice of subcontractor waiver of protection (40 U.S.C. 3133(c)). Any waiver of the right to sue on the payment bond is void unless it is in writing, signed by the person whose right is waived, and executed after such person has first furnished labor or material for use in the performance of the contract.

VOLUME I (Technical Proposal)

1. **FACTOR 1: Specialized Experience Submission Requirements:** Offerors are required to submit a comprehensive and complete technical proposal that demonstrates their ability to perform the work described in this solicitation and demonstrate a minimum of three (3) projects but no more than five (5) projects of similar scope and complexity. All projects submitted for consideration must be at least 75% construction progress complete or completed within 7 years preceding the date proposals are due.
 - a. For the purposes of this solicitation, relevant projects would be similar construction of a Healthcare Facility in size, scope and complexity to the instant requirement. Construction should include mechanical, electrical and plumbing systems as well as medical equipment and furniture installation.
 - b. **Attachment J06, Company Specialized Experience Construction Form** is provided as a reference for information that shall be included with each project. All performance ratings shall be considered for contracts ongoing or completed within the past 7 years from the date proposals are due. The Government reserves the right to evaluate past performance information on proposals submitted in response to this solicitation from any available source.

All projects submitted on a Customer Satisfaction Survey/Past Performance Questionnaire (PPQ) must be at least 75% construction progress complete or completed within 7 years preceding the date proposals are due. The PPQ included in the solicitation is provided for the offeror to submit

Offerors should follow-up with clients/references to ensure timely submittal of questionnaires. If the client requests, questionnaires may be submitted directly to the Government's point of contact, Matthew.Phelps@ihs.gov, via email prior to proposal closing date. Offerors shall not incorporate by reference into their proposal PPQs previously submitted for other RFPs. This does not preclude the Government from utilizing previously submitted PPQ information in the past performance evaluation. SECTION M – EVALUATION FACTORS FOR AWARD

M.1. EVALUATION FACTORS FOR AWARD

- (a) This acquisition will utilize **Lowest Price Technically Acceptable (LPTA)** source selection procedures in accordance with FAR 15.101-2, as supplemented. This is a competitive LPTA best value source selection. The LPTA process is selected as appropriate for this acquisition because the best value is expected to result from selection of the technically acceptable proposal with the lowest evaluated price.
- (b) By submission of its offer, the Offeror accepts all solicitation requirements, including terms and conditions, representations and certifications, and technical requirements. All technically acceptable offerors, with satisfactory past performance, shall be evaluated equally with respect to technical capability and past performance. The best value determination and subsequent contract award will be made to that offeror who has met all solicitation requirements, has been determined to be technically acceptable, has no less than satisfactory past performance, and who has offered the lowest price.
- (c) An overall non-price factor rating must be at least “Acceptable” in order to be eligible for award. An “Unacceptable” rating in any factor results in the overall non-price factors proposal being rated “Unacceptable” unless corrected through discussions. An overall non-price factors rating of “Unacceptable” makes a proposal ineligible for award.
- (d) The Government intends to select ONE contractor for award of this effort. The contracting officer may determine that the number of proposals that might otherwise be included for evaluation of technical acceptability exceeds the number at which an efficient evaluation can be conducted. As such, the proposals will be evaluated by lowest price and if the lowest priced proposal submitted is found technically acceptable, no other proposals will be evaluated, and award will be made to the lowest priced, technically acceptable offeror. However, if the lowest priced proposal is not found technically acceptable, the next lowest priced proposal will be evaluated until the lowest priced, technically acceptable proposal is found.
- (e) For the purpose of award, the Government shall evaluate offers based on the evaluation factors described below. The award decision will be based on the following factors. Factor 6 (Price) will be evaluated in accordance with paragraph (d) of this provision for proposal(s) determined to be acceptable under Factors 1 through 5. The price evaluation will be based on the “Total Price” listed in Section B.1 of this solicitation. **Evaluation factors other than cost or price, when combined, are approximately equal to cost or price.**

FACTOR 1 Specialized Experience (Acceptable/Unacceptable)

FACTOR 2 Past Performance (Acceptable/Unacceptable)

FACTOR 3 Key Personnel (Acceptable/Unacceptable)

FACTOR 4 Example Construction Schedule (Acceptable/Unacceptable)

FACTOR 5 Price

Factor 1 - Specialized Experience

Basis of Evaluation: Evaluation of this factor will be an assessment of the offeror's project experience on an Acceptable/Unacceptable basis. To achieve an Acceptable rating, at least three (3) relevant projects but no more than five (5) projects submitted must be at least 75% complete within the preceding seven (7) years from the date of proposals and must be determined to be relevant in similar size, scope and complexity to the requirements described in this solicitation.

Failure to address any of the required bullets as stated in **L.12 d.(1) FACTOR 1: Specialized Experience Submission Requirements** will result in an "UNACCEPTABLE" rating and possible elimination from further consideration for contract award.

Factor 2 –Past Performance

Basis of Evaluation: The basis of evaluation will be the degree to which past performance evaluations (to include PPQs if applicable) and all other past performance information reviewed by the government (i.e., CPARS, PPIRS, FAPIIS, eSRS, performance recognition documents, etc.) reflect a trend of satisfactory performance. Evaluation of this factor will be an assessment of the overall past performance record.

Offerors need not submit for this factor; but if they choose to, offerors shall submit past performance information on relevant projects that are at least 75% construction progress complete or completed within seven (7) years preceding the date proposals are due on projects submitted under Factor 1, Specialized Experience. The Government may seek all relevant performance information on all responsive and otherwise Technically Acceptable Offerors through sources such as CPARS or PPIRS or other government databases and other sources that are available. The Government shall not be limited in its search for performance data.

In the case of an offeror without a record of relevant past performance or for whom information on past performance is not available or so sparse that no meaningful past performance rating can be reasonably assigned, the offeror may not be evaluated favorably or unfavorably on past performance (see FAR 15.305(a)(2)(iv)). Therefore, the offeror shall be determined to have unknown past performance. In the context of acceptability/unacceptability "unknown" shall be considered "acceptable."

Factor 3 – Key Personnel

Basis of Evaluation: Evaluation of this factor will be an assessment of the offeror's key personnel project experience on an Acceptable/Unacceptable basis. To achieve an Acceptable rating, all three (3) key personnel must demonstrate a minimum of seven (7) years' experience doing work of similar size, scope and complexity for the requirement on projects that are at least 75% construction complete. As a minimum, the Safety Officer must have proof of relevant certification.

FACTOR 4 - Example Construction Schedule

Basis of Evaluation: Evaluation of this factor will be an assessment of the offeror's development of a construction schedule on an Acceptable/Unacceptable basis. To achieve an Acceptable rating, the narrative and example schedule must demonstrate a clear understanding of tasks required and sequencing of tasks for a project of this size, scope and complexity.

Factor 5 - Price

Basis of Evaluation: The Government shall conduct a price evaluation of technically acceptable offer(s). The Government will evaluate price based on the "Total Price" included in Section B.1 of this solicitation using the efficient method of evaluation detailed in paragraph (d) of this provision.

Failure to address any of the Section **L.12.(e) VOLUME II (Price Proposal) Submittal Requirements** may result in an "UNACCEPTABLE" rating and the proposal may not be considered for further evaluation.
