PARASIM® Sole Source, Installation, and Training of Proprietary Technology

The **PARASIM® Virtual Reality Parachute Simulator System** is a patented, proprietary stand-alone simulation system created by Systems Technology, Inc (STI). The associated hardware components and software features are uniquely manufactured to result in the **PARASIM®** military parachute simulator. Training features (such as **PARASIM®** Damped Riser Force Sensors feature, **PARASIM®** Canopy Malfunctions Software feature, and **PARASIM®** wireless military freefall body maneuvering feature) are proprietary products exclusively made, manufactured, and serviced by our company. Systems Technology, Inc. does not utilize distributors, brokers, outside service providers, outside installers, or resellers. If any third party attempts to install, maintain, upgrade, or develop/modify our proprietary system, code, and graphics engine on any of our simulator systems it will breach any warranties or technical service contracts that are in effect. **PARASIM®** is marketed and sold directly to the US Department of Defense through the GSA Advantage Schedule and solely through Systems Technology, Inc.

PARASIM® was originally conceived and created by Systems Technology, Inc (over 30 years ago, therefore STI is the OEM (original equipment manufacturer)). Since that time, over 330 systems have been sold to US and International military, government, commercial, and educational organizations. Over the years, **PARASIM®** has been enhanced and expanded upon by exclusively by STI in response to the parachuting community's needs and current technological advances available. STI continues to hold all patent, proprietary, and engineering rights to **PARASIM®**. The services, support, hardware, and instructor training are only to be performed by STI personnel that are familiar with the software code and hardware setup as improper procedures could cause the hardware to prematurely fail or military personnel to fall from the suspended harness.

PARASIM® is available through GSA Advantage!, Contract GS-02F-0043L. Our Tax ID: #95-1957989 and CAGE Code: #56982. STI has completed online representations and certifications through SAM and is valid until April 2021. **PARASIM®** is a unique design and **PARASIM®** products and any similar items are sold, serviced, and upgraded only by STI personnel.

Very Respectfully,

SYSTEMS TECHNOLOGY, INC.
