Department of Children and Families

Performance and/or Design Requirements (intended use, function or application, compatibility, requirements; reference to policy, rule, statute or other act of the Legislature, as appropriate): Certified Axis Internet Protocol (IP) in design and camera installation and configuration, management of Milestone IP video management/server software, assist staff with role/security management, and configuration, maintenance and monitoring of video storage. Installation and management of all network switches required to operate the Video System.

Intended Single Source:

Split Pine Technologies, LLC

Price:
\$500,000 annually

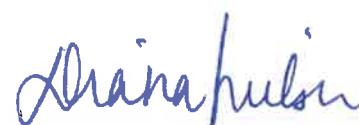

Justification for Single Source Purchase (what is necessary and unique about the commodity, contractual service, or source; steps taken to confirm unavailability of competition, as appropriate):

Split Pine Technologies, LLC is requested as a Single Source due to the fact that they are the only vendor with DCF background security clearance to access our video hardware and recorded streams. Additionally, they are the only licensed provider of services for the surveillance platform in use within a 175-mile radius of the Facilities. If another vendor were chosen, they would have to first go through the DCF-required security and background checks, and then they still wouldn't have manufacturer authorization to perform service or upgrades while maintaining hardware and software warranty status. Choosing Split Pine Technologies, LLC will ensure that the installation maximizes the success of these video surveillance systems in protecting our resident population and our workforce. Also, our current installations/sites are project certified and registered by Axis Communications and Milestone Systems to Split Pine Technologies, LLC as the only reseller or authorized entity to perform upgrades and configuration changes to the system. Any modification or services by others to the DCF Video Management System will void all current warranties

Approved By (names & titles, as appropriate, e.g., requestor, requestor management, information
