SECTION 3 – SCOPE OF WORK

3.1 Background and Purpose

Breast cancer is the most commonly diagnosed cancer and the second leading cause of cancer death among women in the United States and in Maryland.¹ Although Maryland's breast cancer death rate has been consistently declining for two decades, Maryland's rate is still ranked among the highest nationally. For the 2014-2018 period, Maryland had the eighth highest breast cancer death rate in the nation.

Cervical cancer is one of the most common cancers among women. Most cervical cancers take years to develop and precancerous cervical lesions are able to be detected and treated if found early. The Maryland 2018 age-adjusted cervical cancer mortality rate of 2.2 per 100,000 is similar to the national rate of 2.2 per 100,000. The Maryland cervical cancer mortality rate ranked 34th in the nation.

Screening tests are available and have been shown to reduce mortality from breast and cervical cancer. However, many Maryland residents, even those with insurance, are not receiving recommended screening tests for breast and cervical cancer. In Maryland, in 2018, 81.2% of women (50 to 74 years old) reported having a mammogram in the past two years, and 81.3% of women age 21 to 65 years old in Maryland reported having a Pap test within the past three years.

The State is issuing this solicitation for the purpose of providing training and technical assistance to approximately four (4) primary care clinics that are implementing evidence-based interventions (EBIs) through the Maryland Breast and Cervical Cancer Program (BCCP) to increase clinic level breast and cervical cancer screening rates. Under the direction of the Department's BCCP, the Grantee will leverage expertise in quality improvement methods and tools, Electronic Health Record (EHR) data extraction, resources, and other tools to support participating health systems in selecting, implementing, and evaluating appropriate EBIs at the clinic level to ensure increases in breast and cervical cancer screening rates over time. The Grantee will work with approximately four (4) participating clinics on extracting and improving the quality of population health data from the health system's EHR, and continued monitoring of system level changes to identify opportunities to improve EHR data quality. This support may include in-person or virtual training as well as calls and onsite meetings with staff from participating clinics. The Grantee will also support the implementation of systems-level changes and EBIs at selected clinics as recommended by The Community Guide (<https://www.thecommunityguide.org/topic/cancer>). The goal is for the Grantee to serve as a technical assistance consultant to work with health systems to improve system infrastructure, using quality improvement tools such as process mapping to promote breast and cervical cancer screening via the following EBIs: patient reminder systems, provider reminder systems, provider assessment and feedback, reducing structural barriers, small media, patient education, and reducing out-of-pocket costs.

EXHIBIT D – WORK PLAN TEMPLATE

Partnerships to Increase Breast and Cervical Cancer Screening in Clinical Settings in Maryland: Consultant for Training and Technical Assistance

Organization: XXXXXXXXXXXX

Instructions: Complete the work plan template on the following page. Refer to the definitions below for further guidance.

Objectives

Objectives are the “big steps” a program will take to attain its goals. Objectives should be S.M.A.R.T. (specific, measurable, attainable, realistic, and time-bound). The template includes three required objectives; however, you may add additional objectives, as necessary.

Activities

Activities are the “smaller steps” a program takes to meet its objectives. Examples can include, but are not limited to, conducting a mailing to patients to remind them of their screening due date, holding training for staff to encourage staff development, conducting daily huddles to remind providers of patients who are due for screening, or analyzing data to determine screening rates. The template includes space for two activities for each objective; however, you should add activities, as necessary.

Data/Outcome Measures

The data or outcome measures describe how the program will know that an activity has been conducted and the progress made. There should be at least one measure for each activity.

Timeframe

The timeframe for the activity should describe when the particular activity will be undertaken, with a start and end date. Sometimes, it will be appropriate to list several dates or the entire project period.

Team Members Responsible

This column reflects the staff members that will be responsible for conducting the associated activity.

Objective #1: Plan and implement training and technical assistance activities to assist approximately four (4) primary care clinics with assessing, enhancing, and evaluating their capability to increase breast and cervical cancer screening rates through quality improvement processes and the implementation of EBIs.

FEDERAL FUNDS

A Summary of Certain Federal Fund Requirements and Restrictions
[Details of particular laws, which may levy a penalty for noncompliance,
are available from the Maryland Department of Health.]

1. Form and rule enclosed: 18 U.S.C. 1913 and section 1352 of P.L. 101-121 require that all *prospective* and present subgrantees (this includes all levels of funding) who receive more than \$100,000 in federal funds must submit the form "Certification Against Lobbying". It assures, generally, that recipients will not lobby federal entities with federal funds, and that, as is required, they will disclose other lobbying on form SF- LLL.
2. Form and instructions enclosed: "Form LLL, Disclosure of Lobbying Activities" must be submitted by those receiving more than \$100,000 in federal funds, to disclose any lobbying of federal entities (a) with profits from federal contracts or (b) funded with nonfederal funds.
3. Form and summary of Act enclosed: Sub-recipients of federal funds on any level must complete a "Certification Regarding Environmental Tobacco Smoke," required by Public Law 103-227, the Pro-Children Act of 1994. Such law prohibits smoking in any portion of any indoor facility owned or leased or contracted for regular provision of health, day care, early childhood development, and education or library services for children under the age of 18. Such language must be included in the conditions of award (they are included in the certification, which may be part of such conditions.) This does not apply to those solely receiving Medicaid or Medicare, or facilities where WIC coupons are redeemed.
4. In addition, federal law requires that:
 - a) OMB 2 CFR 200, Subpart F, Audit Requirements requires that grantees (both recipients and sub-recipients) which expend a total of \$750,000 or more in federal assistance shall have a single or program-specific audit conducted for that year in accordance with the provisions of the Single Audit Act of 1984, P.L. 98-502, and the Single Audit Act Amendments of 1996, P.L. 104-156. and the Office of Management and Budget (OBM) 2 CFR 200, Subpart F.
 - b) All sub-recipients of federal funds comply with Sections 503 and 504 of the Rehabilitation Act of 1973, the conditions of which are summarized in item (C).
 - c) Recipients of \$10,000 or more (on any level) must include in their contract language the requirements of Sections 503 (language specified) and 504 referenced in item (B).

Section 503 of the Rehabilitation Act of 1973, as amended, requires recipients to take affirmative action to employ and advance in employment qualified disabled people. An affirmative action program must be prepared and maintained by all contractors with 50 or more employees and one or more federal contracts of \$50,000 or more.

This clause must appear in subcontracts of \$10,000 or more:

i. The contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified handicapped individuals without discrimination based upon their physical or mental handicap in all upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

ii. The contractor agrees to comply with the rules, regulations, and relevant orders of the secretary of labor issued pursuant to the act.

iii. In the event of the contractor's non-compliance with the requirements of this clause, actions for non-compliance may be taken in accordance with the rules, regulations and relevant orders of the secretary of labor issued pursuant to the act.

iv. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices in a form to be prescribed by the director, provided by or through the contracting office. Such notices shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified handicapped employees and applicants for employment, and the rights of applicants and employees.

v. The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or other contract understanding, that the contractor is bound by the terms of Section 503 of the Rehabilitation Act of 1973, and is committed to take affirmative action to employ and advance in employment physically and mentally handicapped individuals.

vi. The contractor will include the provisions of this clause in every subcontract or purchase order of \$10,000 or more unless exempted by rules, regulations, or orders of the [federal] secretary issued pursuant to section 503 of the Act, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the director of the Office of Federal Contract Compliance Programs may direct to enforce such provisions, including action for non-compliance.

Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. Sec. 791 et seq.) prohibits discrimination on the basis of handicap in all federally assisted programs and activities. It requires the analysis and making of any changes needed in three general areas of operation-programs, activities, and facilities and employment. It states, among other things, that:

Grantees that provide health...services should undertake tasks such as ensuring emergency treatment for the hearing impaired and making certain that persons with impaired sensory or speaking skills are not denied effective notice with regard to benefits, services, and waivers of rights or consents to treatments.

D) All sub-recipients comply with Title VI of the Civil Rights Act of 1964 that they must not discriminate in participation by race, color, or national origin.

E) All sub-recipients of federal funds from SAMHSA (Substance Abuse and Mental Health Services Administration), NIH (National Institute of Health), CDC (Center for Disease Control and Prevention), and HHS (Health and Human Services) are prohibited from paying any direct salary at a rate of Executive Level

II or more than \$189,600 per year. (This includes, but is not limited to, sub-recipients of the Substance Abuse Prevention and Treatment and the Community Mental Health Block Grants and NIH research grants, Public Health and Emergency Preparedness and Hospital Preparedness Program Cooperative Agreements.)

F) There may be no discrimination on the basis of age, according to the requirements of the Age Discrimination Act of 1975.

G) For any education program, as required by Title IX of the Education Amendments of 1972, there may be no discrimination on the basis of sex.

H) For research projects, a form for Protection of Human Subjects (Assurance/Certification/Declaration) should be completed by each level funded, assuring that either: (1) there are no human subjects involved, or that (2) an Institutional Review Board (IRB) has given its formal approval before human subjects are involved in research. [This is normally done during the application process rather than after the award is made, as with other assurances and certifications.]

I) In addition, there are conditions, requirements, and restrictions which apply only to specific sources of federal funding. These should be included in your grant/contract documents when applicable.
